Health Program Overview	Max. Students	At KLCH
<i>College field trip for future educators</i>	50	\$12/student or \$325 minimum

Questions About Our Fees

What if our School or District has limited funds available for programming?

The Kansas Learning Center for Health receives grants and private donations, and often has the ability to find grant funding for your school, or offer scholarships or discounts for programs. For more information please contact us at **316-835-2662** or scheduler@learningcenter.org.

Why is the cost of a program \$12-\$15 per student?

- Student fees only cover 25% of the cost of our programming
- Donated revenue from individuals, and grants from foundations and government agencies helps to bridge the gap
- Costs of running the organization are included in student fees including; development of program content, and administrative expenses such as reservations, billing, and management.

Why are Live Virtual programs less expensive than in-person presentations?

- We save time on travel and mileage when compared to an in person presentation.
- We need only one educator to present the programs and conduct the Q&A sessions.
- These Q&A sessions are only 30 minutes and require less preparation than a full program.
